

Modular Clinics – Healthcare Facility Solution

With the increasing need for quality Healthcare facilities throughout Africa, we believe that to make the health care system work, the correct infrastructure needs to be in place. Whether it's a clinic, a laboratory, or a complete hospital facility our design manufacturing and building expertise helps bring Healthcare to areas that need it most, for a fraction of the normal "brick and mortar" price. We have been instrumental in working with local and national healthcare professionals to ensure we provide low cost pre-fabricated modular Healthcare infra-structure in Africa. Manufactured to the most stringent International Quality Control Standards, our structures meet all necessary Regulations.

Features & Benefits

- **Cost-Effectiveness**

Critical Healthcare Infrastructure for a fraction of the price.

- **Fast Turn Around Times**

With pre-fabricating panels and onsite assembly, there is minimum disruption and timely delivery to ensure patients have the best care, fast.

- **Fire Resistance**

Polyurethane will not burn on its own, in fact when left to burn the fire will extinguish itself.

- **High Modularity**

Easy to add additional space or buildings to your facility, we can adapt and expand the modular buildings as the needs of the Healthcare providers changes

- **Intelligent Sealant Design**

For our panels we offer a unique double “Tongue and Groove system” which creates perfect sealant against dust, dirt and water to ensure a clean and sterile environment.

- **Long Lifespan**

Our Modular Building Structures have a lifespan of 25-30 years.

- **Noise Suppression**

Effective in keeping outside noise to a minimum, patients, nurses & Doctors can work in a noise and stress-free environment.

- **Thermal Resistance**

Keep patients and Healthcare workers cool in summer and warm in winter and drastically reduce the cost of cooling and warming bills, such as air conditioning.
